

PRODUCTS THAT REQUIRE STRIPPING PRIOR TO CLEAN & COAT

Orange Glo, Rejuvenate, Quick Shine, Bona Polish, Pledge Floor Finish, Liquid Gold Floor Restore and many other floor “finishes” contain acrylic wax that fog, scratch, peel and prevent true urethane finishes designed for wood floors from properly adhering. These finishes MUST be removed to apply Ripley’s urethane maintenance coat.

PRODUCTS THAT WITH WAX CANNOT BE COATED

Johnson’s Paste Wax and similar products cannot be completely removed and interfere with urethane top coats. Generally, these floors can be cleaned and re-polished with the same paste wax.
